

# TALLER DE EXPERIENCIA DE USUARIO UX

Sergio Majluf Jadue - Aarón Montoya Moraga Andrés Martin

## pero hay más...

¿Cómo hackeamos, modelamos y aplicamos tecnologías que impulsen el diseño?

## **Knock Knock**

A playful calculator designed for small children. Knock out a calculation on the wood surface and it will knock back with the answer. Installation: original woode

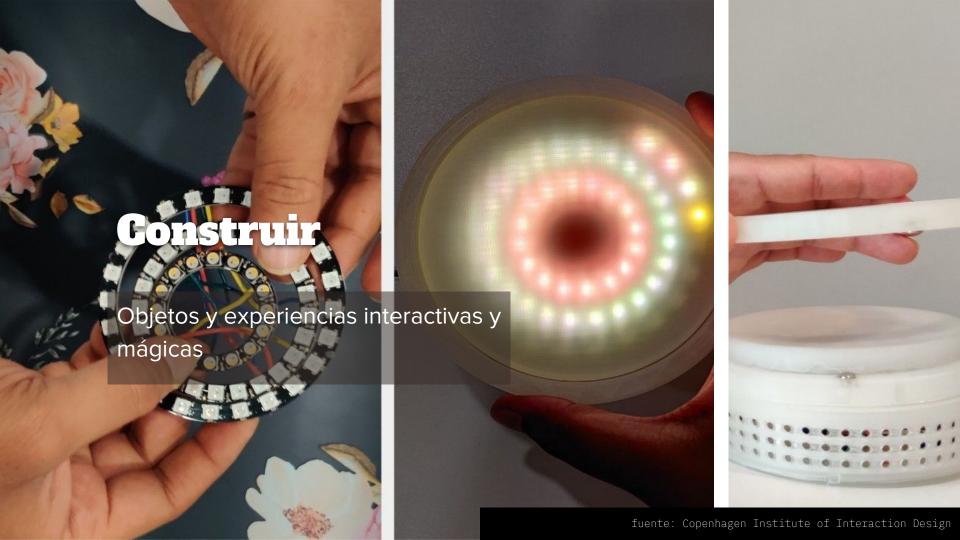

**Proceso de Taller** 

Explorar + Programar + Prototipar

```
import delay from './delay'
             import people from './people'
             const add = async function(a, b) {
                 delay(10)
Programar(a < 0) throw new Error('not supported')
                 return a + b
Aprenderemos principios aplicados de
programación orientada al Diseño y la
Creatividad
             const result = await add(2, 3)
             result 5
```

people.map(p => p.age)

#### Alta Quanto: Design for disaster preparedness

United Kingdom

With the increase in unforeseen climate-related disasters, designing educational and risk communication tools that are engaging and effective has become vital. These tools are essential for improving the responses of vulnerable communities.
